FORMATIVE ASSESSMENT – 2 (FA-2)

MATHEMATICS PROJECT WORK

Topic: Lines and Angles (Parallel Lines & Transversal)

PRELIMINARY INFORMATION

Name of the Student: .....

Class & Section: **Class 9 ( )**

Roll Number: .....

Name of the Lesson: **Lines and Angles**

Name of the Guide Teacher: .....

AIM

To draw two parallel lines intersected by a transversal, measure the angles using a protractor, and verify the properties of corresponding, alternate, and interior angles.

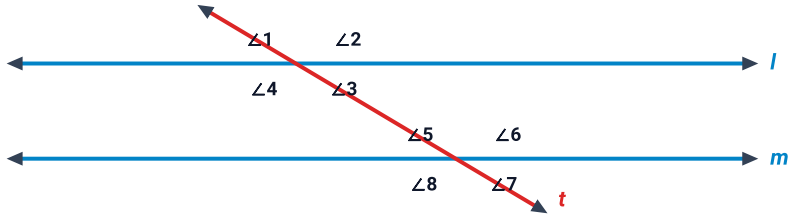

MATERIAL REQUIRED

- White A4 Paper
- Geometry Ruler
- Protractor
- Pencil & Eraser
- Pen

PROCEDURE

1. **Construction:** Draw parallel lines *l* and *m* cut by transversal line *t*.
2. **Marking:** Label the 8 angles ∠1, ∠2, ∠3, ∠4 at upper intersection and ∠5, ∠6, ∠7, ∠8 at lower intersection as shown in the figure.
3. **Verification:** Measure each angle with a protractor and record in the table.

GEOMETRIC FIGURE (PARALLEL LINES & TRANSVERSAL)

OBSERVATION AND MEASUREMENT TABLE

S.No.	Type of Angles	Angle Pair	Measurement (Degrees)	Observation
1	Corresponding Angles	**∠1 and ∠5**	∠1 = 70°, ∠5 = 70°	**∠1 = ∠5 (Equal)**
2	Alternate Interior Angles	**∠3 and ∠5**	∠3 = 110°, ∠5 = 110°	**∠3 = ∠5 (Equal)**
3	Alternate Exterior Angles	**∠1 and ∠7**	∠1 = 70°, ∠7 = 70°	**∠1 = ∠7 (Equal)**
4	Interior Angles on Same Side	**∠4 and ∠5**	70° + 110° = 180°	**Supplementary**

CONCLUSION

Through practical measurement with a protractor, it is confirmed that when two parallel lines are cut by a transversal, corresponding angles and alternate angles are equal, and interior angles on the same side add up to 180°.
