MATHEMATICS PROJECT WORK RECORD :: FA-3

Topic: Frequency Distribution Table

1. PRELIMINARY INFORMATION

Name of the Student:	.....
Class & Section:	.....
Roll Number:	.....
Subject:	**Mathematics**
Topic:	**Frequency Distribution Table**

2. AIM

To collect and organize the daily study hours of 25 classmates into a frequency distribution table and represent the data graphically using a histogram to draw meaningful conclusions.

3. OBJECTIVES

- Collect primary data from 25 students.
- Find the range and determine class intervals.
- Prepare a frequency table with tally marks and mid-values.

4. MATERIALS REQUIRED

Project paper, ruler, pencil, pen, and Class 8 Mathematics textbook.

5. PROCEDURE

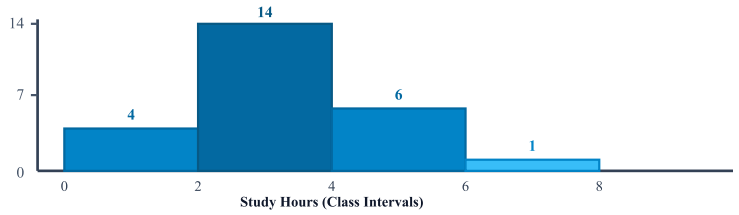

1. **Step 1:** Surveyed 25 classmates and recorded their daily study hours.
2. **Step 2:** Identified minimum (1 h) and maximum (6 h) values. Range = 6 − 1 = 5 hours.
3. **Step 3:** Formed uniform class intervals of size 2 (0–2, 2–4, 4–6, 6–8).
4. **Step 4:** Marked tallies, calculated frequencies, and found class marks using (L + U) / 2.

6. OBSERVATIONS AND TABULATION

Raw Data (Daily Study Hours):

2, 3, 1, 4, 2, 3, 5, 2, 1, 3, 4, 2, 6, 3, 2, 1, 4, 3, 5, 2, 3, 4, 1, 2, 3

Class Interval (Hours)	Tally Marks	Frequency (f)	Class Mark (x_i)
0 – 2	||||	4	1
2 – 4	𝍸 𝍸 ||||	14	3
4 – 6	𝍸 |	6	5
6 – 8	|	1	7
Total	—	**N = 25**	—

- **Highest Frequency:** 2 – 4 hours (14 students).
- **Lowest Frequency:** 6 – 8 hours (1 student).

7. CONCLUSION

- Grouping raw data into a frequency table makes comparison direct and clear.
- Most students (56%) spend between 2 and 4 hours studying daily.

8. ACKNOWLEDGEMENT

I sincerely thank my **Mathematics Teacher** for continuous guidance and my classmates for their cooperation.

9. RESOURCES

Telangana SCERT Class 8 Mathematics Textbook and classroom survey data.
